Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: In reference to claim 25, applicant argues that Ishida doesn't teach support for the phase connector and that there is a difference between an electrical and mechanical connection. The Examiner disagrees in that an electrical connection is a mechanical connection and is therefor "support." Examiner suggests that the applicant narrows the claim to clearly define the phase connector support. In reference to claim 27, the applicant argues that the phase connector doesn't extend from the cover. Examiner disagrees and suggests that Ishida teaches, teaches in figure 2, the phase connector extending from the cover.
